

 **BSCiLMS.com**  
Educational resources for building supply professionals

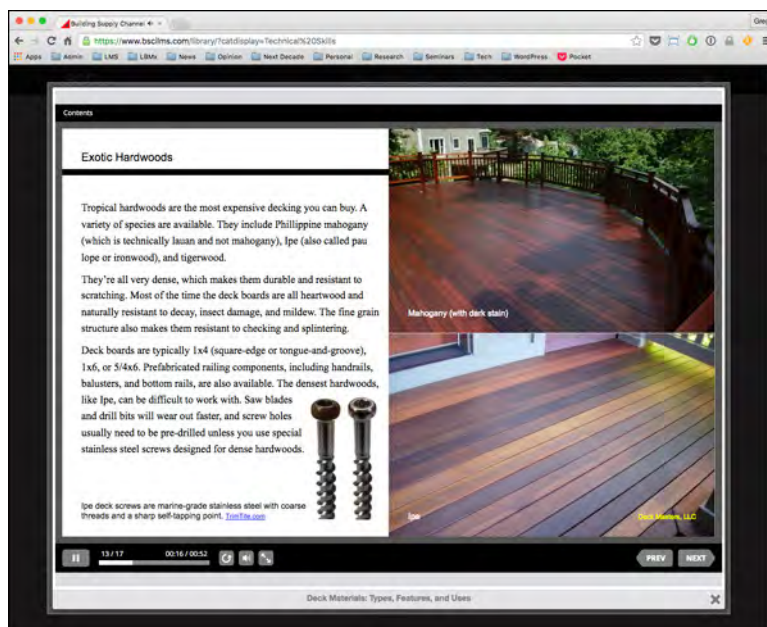

“After 16 years in the business, I thought the courses would be just a refresher. I learned something new from every one I took.”

Get your employees up to speed quickly and cost-effectively with the BSCi Learning Management System.

We offer over 160 topics plus all the tools you need to manage training in minutes each month: assignments, progress tracking, test scores, downloadable reports, and a skills evaluation test.

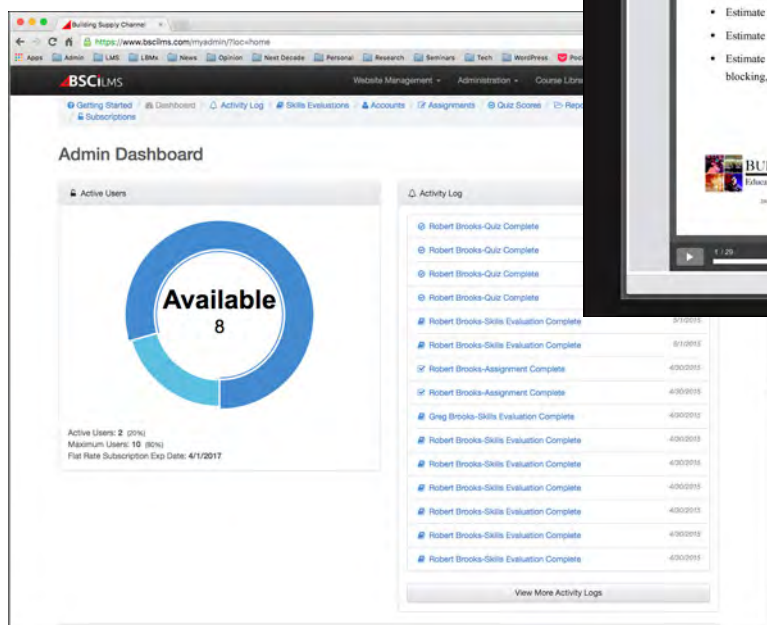

Our courses are written by building supply industry veterans with decades of field experience, and designed around two principles: 1) Deliver real-world information and 2) don't waste people's time.

Nothing revolutionary. Just what we wish we'd had available when we were on the sales counter.

**160+ TOPICS**

Building materials, construction, estimating, selling skills, customer service, inventory management, supervisory skills, and computer skills.

**LEARN ANYTIME, ANYWHERE**

Learn on the job or at home on your computer, tablet, or mobile device

Simple, easy, and cost-effective...

### 1. REGISTER FREE

Set up your company account so you can track employees' usage and test scores, then assign our FREE skills evaluation test to anyone you want. Our system will recommend courses for each person based on their test scores.

### 2. BUY ONLY WHAT YOU NEED

Buy as many or as few seat licenses as you need, assign them to the people who need training, then assign the courses you want them to take.

### 3. TRANSFER WHEN YOU'RE DONE

Once each person completes his or her assignments with satisfactory test scores, you can queue the seat license to transfer to another employee at the end of each monthly period.

# ONLY \$59 PER MONTH

“Even my old-timers are saying things like, ‘This isn’t so bad, after all’ and ‘I really learned something.’ That’s music to my trainer’s ears.”
